#### Evergreen Updates

London, England

**Evergreen Updates** is a logistics and freight company based in the United Kingdom, specializing in providing transportation, delivery, and supply chain solutions. The company offers a wide range of services, including the movement of goods both domestically and internationally, catering to businesses and individuals with specific logistics needs.

- Integrated real-time shipment tracking capabilities into the website, allowing customers to track their packages and shipments directly from the portal. This feature improved **customer satisfaction** and reduced support inquiries by **25%**.
- Built robust backend systems to automate key logistics processes such as inventory management, delivery scheduling, and billing. This resulted in better data accuracy, quicker processing times, and **improved operational efficiency**.
- Designed and developed a fully responsive, user-friendly website tailored to the needs of logistics and freight customers. Ensured that the site provided easy access to services, pricing, and real-time updates on shipments, leading to **increased customer engagement**.
- Trained internal teams on how to manage and update the website's content and features, reducing the reliance on external support and empowering the team to handle basic updates independently.
- Enhanced website performance by reducing load time by 50% by implementing efficient coding practices and leveraging cutting-edge technology.

#### RCCG Faith Foundation Fellowship Centre

Essex, England

**RCCG Faith Foundation Fellowship Centre** is a branch of the **Redeemed Christian Church of God (RCCG)**, a global Christian denomination known for its commitment to spreading the gospel, fostering community, and supporting individual spiritual growth. The Faith Foundation Fellowship Centre is one of the many centers within RCCG, designed to provide a platform for believers to worship, grow in their faith, and engage in various activities that nurture both their spiritual and personal lives.

- Integrated secure online giving and donation systems, allowing members to contribute easily via credit cards or bank transfers.
- Created and implemented an event management system that allows members to register for church events, conferences, and retreats online.
- Integrated social media and video platforms (like YouTube, Facebook) to reach a larger audience, increasing online engagement and participation.
- Implemented email newsletters and notifications to keep the congregation informed of news, events, and prayer requests, improving communication and community engagement.
- Integrated this system with the church's internal management system, ensuring that prayer requests are tracked and prayed over by the pastoral team.
- Optimized the church's website for search engines, making it easier for people to find the church online and learn more about its services and programs.
- Integrated tools like Google Analytics to track website traffic and engagement, providing insights into how members interact with online content.

#### Delta State University, Nigeria

Delta State, Nigeria

**Delta State University (DELSU), Abraka, Nigeria** is a renowned higher institution located in Abraka, Delta State. Established in 1992, the university is recognized for its commitment to academic excellence, research, and the development of human capital in various disciplines.

- Designed and implemented a web-based system to digitise financial operations within the Bursary Department, significantly improving accuracy and reducing manual errors.
- Integrated existing data from multiple sources into a centralised database, enabling real-time access and improved financial reporting. This reduced report generation time by over **40%**.
- Received commendations from university leadership for introducing tech-driven solutions that modernised the financial workflows of the institution.
- Reduced operational costs by replacing outdated manual processes with digital systems, contributing to the department's long-term financial sustainability.
- Worked closely with finance officers, IT staff, and university administrators to align technological solutions with the department's operational goals.
